

Meeting with	Marta Centkowska
Organization	JEMS Architekci
Date	07.08.2009
Location	Warsaw

Introduction:

JEMS Architekci is a team of modern building art architects. The company is located in the capital of Poland, Warsaw, where it is well known for its out-of-the-box solutions.

Today we had the pleasure to speak with Mrs. Marta Centkowska about her cooperation with other companies.

Projects:

JEMS Architekci is active in many areas, in which its projects have received several Polish and international awards. Starting with squares projects, like for instance the winner of the architecture competition - Hoover square in Warsaw. The company specializes as well in office complexes like Platinum Business Park in Warsaw or Agora headquarters, which was chosen the best public object project of the year 2003 in Poland. Moreover libraries lie in the interest of JEMS Architekci. The most famous project in this area is Raczyński Library in Poznań – which won the SARP competition. External and internal hotel plans are also done by the company. The project of a new five stars object located in Warsaw Okęcie Airport is being prepared by the company.

Since the company is active in such a wide area it needs the newest information concerning technologies and solutions used nowadays. That is why JEMS Architekci cooperates with other companies, such as suppliers and consultants on a regular basis.

On behalf of JEMS Architekci we invite all companies interested in cooperation. The only condition of cooperation is, as we were told, the out of the box concept products or solutions, that will contribute to the value of projects.

In case of interest we are presenting the company contact details below:
