

Interview with	Maciej Boratyński
Organization	BUDUS S.A.
Date	16-11-2010
Location	Phone interview

"BUDUS" SA is a company from Katowice specializing in providing comprehensive construction services. BUDUS can be hired as general contractor, direct contractor or subcontractor.

BUDUS is concerned with the renovation of the floor level of the central railway station in Cracow, Mostostal with the first level where the platforms exist.

The new Cracow Central Station will be part of a modern hub, connecting the underground tram, car and bus station and the shopping mall Galeria Krakowska with the train station, which will be connected in its turn by a train line to Balice airport Cracow.

- BUDUS SA realize that investment for 62,78 mln zł gross.
- The reconstruction of the Cracow Central Station is a project co-funded by the European Union (Programme Infrastructure and Environment) and the state budget.

First, BUDUS will reconstruct the outside of the building. Then they will commence on the renovation of the inside of the building, containing of amongst others:

- new waiting rooms for passengers
- stores
- ticket systems and windows

- Monitoring system
- Adaptations for people with disabilities

They are now in the negotiation phase with different public institutions about the transfer of the building plot and its legislations. The outcome will be known after the elections (21 November).

BUDUS is the final decision maker concerning the purchases. For this moment there aren't products or services needed.

The construction is planned to commence in December – first quarter of 2011 and is planned to be ready in the second quarter of 2012.
