

Event	Interview
Interviewee	<u>Mr. Eugeny Boki</u> Development Director, Aerobud Company
Date	13 April 2010

*Business reference: **Aerobud** is a construction company, active in design, construction and reconstruction of commercial and residential real estate including airport infrastructure, hotels and logistics centers. Company was established in 1995.*

Aerobud performed general contractor functions of Boryspil International Airport reconstruction project launched in late 90s and held at the beginning of 2000s. Scope of Aerobud's activities covered the following activities:

- *Installation of airfield surface based on slurry-seal emulsion-mineral mixtures and complete range of airfield repair works, including deformation joints;*
- *Full range of construction works, including reconstruction and upgrading the sanitary, electric, fire safety, security alarm, CCTV, access control systems etc.*

Architects and constructors of Aerobud have also designed Terminal B waiting hall and a duty free shop, remarkable for its unique roof design.

Eunite Ukraine (EU): What role does Aerobud play in a new passenger Terminal D construction held today in Boryspil International Airport?

Eugeny Boki (EB): Aerobud Company is responsible for installation of piles for the passenger Terminal D and road interchange. Next to that we have submitted to the General Contractor several commercial proposals for performing number of other tasks within the construction of this terminal.

EU: What is the current phase of your works fulfilment?

EB: As of today Aerobud has finished installation of piles under the Terminal D building and started to work on a road interchange development.

EU: On your opinion, what are the key factors that influence a success of the Terminal D construction?

EB: As of us, we think that the key factors that influence terms and quality of works performed are effective cooperation within a Customer – General Designer – General Contractor triangle and a competent engineering supervision.
