

Event	Interview
Interviewee	Mr. Alexander Saprykin, Advisor of the Vice-President of the Kyivmiskbud Holding
Date	17 April 2009

Eunite Ukraine (EU): What is the current status of NSK “Olimpiysky” reconstruction?

Mr. Alexander Saprykin (AS): As you know, on 28 November 2008 we signed an agreement with NSK “Olimpiysky” on the construction and assembling works. According to the time schedule developed for this project, the main works should be finished by December 2012. The object itself is to be put into operation in June 2011. As of now, the works are being conducted according to the time schedule. There are 23 construction companies that are involved in this project. They provide 1500 engineers and technicians as well as 200 units of construction machinery.

EU: What works on the stadium are already finished?

AS: The current situation on the works conducted at the stadium is the following:

- poles installation for the lower layer of the stand is finished;
- strengthening of the bases for the upper layer of the stand is finished;
- demolishing of the reinforced concrete folds in 9 sectors of the upper layer of the stand and the installation of the sheet pilings are finished;
- installation of the collar beams monolithic constructions of the lower lawyer of the stand iis carrying out (59);
- installation works on poles of sheet pilings are being conducted, out of 635 poles 445 are already installed;
- relocation of the public utilities is being conducted, as of now 68% is already done. The works are to be finished by May 2009.

EU: What is the scope of works planned for 2009?

AS: Generally, we are going to finish all the preparatory works, namely demolishing, setting out the public utilities, retaining walls construction, strengthening of the poles’ bases. We also plan to start working on the VIP zone, fan zone, sport arena and overpass. All the works will be accomplished in strict accordance with UEFA requirements and keeping to the deadlines defined in the time schedule.

EU: What is the strategy of choosing the materials and equipment for this project implementation?

AS: Materials and equipment are being chosen on a tender basis according to the Statement on the selection of subcontractors and material suppliers for reconstruction of NSK “Olimpiysky” #2/0/8-09 dated of 04.02.2009. The key qualifications for tender participation are the expertise of the bidder, his professionalism as well as previous experience in the similar projects.

EU: Do you see any risks that can influence the project implementation?

As: No, as of now, I do not see any risks for the successful finishing of the works on this project.
