

Meeting with	Justyna Jaworska
Organization	Zielona Architektura
Date	17 March 2009
Location	Phone interview

Introduction:

The Zielona Architektura is a company specializing in development and renovation of green and sport objects, such as stadiums, football pitches, and other sports object. The firm is cooperating with foreign suppliers on a regular basic. To its clients belong mainly first league clubs. 13 out of 19 Polish first league heated football pitches were built by Zielona Architektura. Moreover, the company is known in the Czech Republic as well as in Portugal, where it renovated the football pitch of Benfica Lisboa.

The second activity of the company is the distribution of special football fields maintenance equipment. The company represents on the Polish market such brands as Netlon, Dennis and Fibresand.

The company is also active in the renovation of old and establishing new gardens, as well as in broadly understood city greenery.

Projects:

According to Justyna Jaworska Poland is becoming a football nation. Not only big stadiums for Euro 2012 are being build nowadays in Poland, she underlined. There is a great demand for reconstruction of stadiums of clubs playing in all leagues. There is also a governmental program which helps municipalities all over Poland to build small size football pitches. That is the reason why the company is constantly looking for polish and foreign business partners.

Opportunities:

The company would like to be presented offers of companies willing to cooperate with Zielona Architektura. Especially the company is interested in following groups of products:

- Lightning systems,
- Sound systems,
- Turf heating systems,
- Artificial turf,

- Synthetic turf,
- Acryl pavement,
- Fencing,
- Artificial grass
