

Interview with	Marek Oblicki
Organization	Bilfinger Berger Construction
Date	02 March 2011
Location	Phone interview

General information

Bilfinger Berger is a large, internationally active construction and services company based in Mannheim, Germany.

Bilfinger Berger Construction SA specializes in the implementation of the broad construction projects, particularly in the transportation construction industry. We offer our clients comprehensive services including:

- construction and repair of roads, streets, airports;
- construction of road infrastructure;
- manufacture of road-bituminous mixtures mineral;
- performance of bridges, tunnels, viaducts;
- And other engineering structures.

Euro 2012

Representatives of Bilfinger Berger Construction signed a contract for the modernization of the railway station Warszawa Stadion.

The contract, worth 64 mln zł, includes:

- Complete renovation of both platforms

- The reconstruction of the underpass under the tracks
- The upgrading of track structure with a total length of 2.6 km
- New lighting (amongst others in the station and in the pedestrian underpass under the tracks and platforms)

The work is scheduled to start the 20th of March 2011 and finished in November 2011.

Because of the cooperation with sub-contractors, Mr. Oblicki is not fully aware of the complete demand for products and services concerning the project,

- ⇒ Dutch companies that see opportunities in this project, please send your offer direct to Mr Oblicki's email address. Nevertheless, the engineering (civil, mechanical and electrical) will be done by the already chosen sub-contractors.
