General information

Eurovia Polska S.A. is operating on the Polish market under this name since 2003

In 2007 the company expanded to operate actively on the road construction market across the entire country. The territorial structure is based on the operations of three regions that include various national voivodships: Northern Region, Western Region and Southern Region.

The main areas of the operations of the company include road construction and road material production, such as asphalt and grit. Recently they are also occupied with the building of railroad tracks. Eurovia Polska S.A. operates as contractor, general contractor and consortium leader.

Eurovia works often with sub contractors and are the decision making unit considering the definitive choice of products necessary for their projects.

IMPORTANT NUMBERS

- Approx.1000 employees
- 14 construction divisions and 2 central units
- 1 emulsion manufacturing plant
- 9 asphalt mixing plants

Euro 2012

Mazowieckie voivodship

The contract (of PLN 188 million value) will be executed in the period from January 2011 to August 2012. Eurovia Polska and its consortium partner will build: expressway and local road system, 8 viaducts and a footbridge across in Jerozolimskie Avenue, storm water drainage with waste treatment facilities, road safety facilities, environmental protection facilities of noise barriers and planting of greenery and also rebuild: cross roads and utilities.

Two other large projects that are planned to be finished before Euro 2012 are:

- 1) The construction of the S5 national road together with Hochtief and Warbud: From Poznan to Gniezno.
- 2) The construction of the S7 national road: Elbląg – Kalsk
